我理解人类行为、疗愈、和心理治疗的视角

# 人类行为

“我是人，没有任何与人类相关的事宜对我来说是陌生的。”

- 泰伦斯

“I am a human, and I consider nothing that is human alien to me.”

- Terrence

泰伦斯 公元前195 - 公元前159?

# 人类行为

“不想去理解别人的人没有资格给出对方言行不符合常理的论断。”

- 汤玛斯·萨斯

“He who does not want to understand the other has no right to say that what the other does or says makes no sense.”

- Thomas Szasz

# 疗愈和心理治疗

“疗愈不可或缺，而心理治疗可有可无。”

- 张怀宇

“Healing is essential, and therapy is optional.”

- Huaiyu Zhang

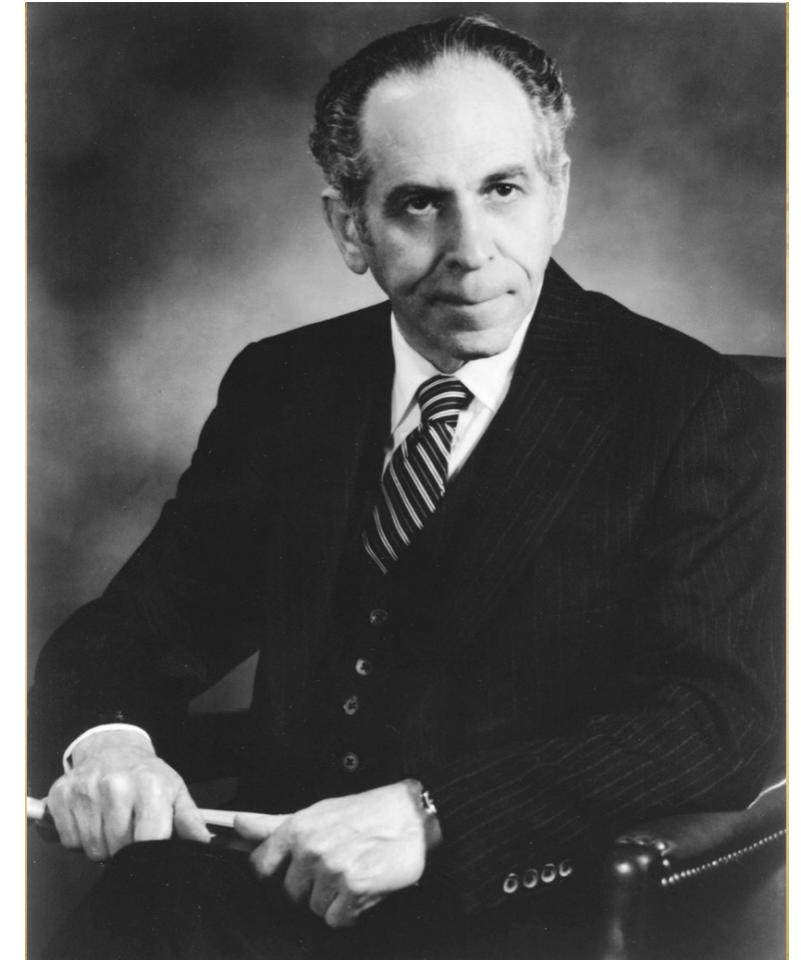

# 心理治疗

“最有效心理治疗方式是刚好符合特定的来访者的人生需求的那一种方式。”

- 汤玛斯·萨斯

“That form of psychotherapy is most effective which happens to meet the existential needs of that particular client.”

- Thomas Szasz

汤玛斯·萨斯 1920 - 2012

# 心理治疗

你是选择病理化的比喻，还是庆祝式的比喻？  
- 布拉德利·刘易斯

I think the fork that comes up the most is: Do you want to use a **pathological metaphor**, or do you want to use a **more celebratory metaphor**? Because the mainstream, whether it's biological, psychoanalytic, cognitive behavioral..., there is something pathological, there is something broken that needs to be fixed. But in a more celebratory model, more affirmative model, more generative model, then the difference from norm is more like a gift than a dysfunction. And that gift is usually organized around sensitivity or learning.

Kind words warm up those on a freezingly cold day,

while hurtful words send a chill to those on a hot summer's day.
